PSC APPROVES AMENDMENT TO WATER TERRITORIAL AGREEMENT

JEFFERSON CITY—The Missouri Public Service Commission has approved an amendment to a water territorial agreement between Public Water Supply District No. 2 of St. Charles County and the City of Wentzville which resolves water service boundary issues regarding the City of Foristell. The Commission originally approved a water territorial agreement between the two entities in October 2000. That agreement designated the boundaries of each supplier within part of St. Charles County.

An amendment to the agreement was requested because the City of Foristell seeks to sell its municipal water system to Public Water Supply District No. 2 of St. Charles County. The previous territorial agreement placed a portion of the City of Foristell's existing system solely within the designated service boundaries of the City of Wentzville. The amendment approved by the Commission reassigns the service boundaries allowing the water district to complete its transaction with the City of Foristell.

Public Water Supply District No. 2 of St. Charles County and the City of Wentzville state the amended territorial agreement will not result in a change of water supplier for any customer currently served by either the water supply district or the city.

The Commission, having reviewed the evidence filed in this case, has determined that the amendment to the territorial agreement between the City of Wentzville and Public Water Supply District No. 2 of St. Charles County is in the public interest and should be approved.
